

BOBBY GOALS

Profit Extra Guide

Profit Extra combines modern mathematics, technology and horse racing know how, to provide a full and comprehensive report on all angles that are significant to every race. It is packed with powerful perspective taken from a database with over 64 million snippets of important information from previous races.

Every day Profit Extra strengthens, by analysing additional data to provide better insight and enhance its dynamic features.

FC (Forecast) produces impactful reports on how likely the horse is going to perform for the race ahead and beyond. The report is numerical with 0 as the starting point. A blank will be returned if the horse is lightly raced. FC can be found on the second row in column 4.

Our exclusive **Jockey and Trainer Ratings** offer a fair assessment on capabilities. Unlike FC, the ratings start at 1 (for average).

Win% present each horse with an accurate estimation of chance of winning.

BGR (Bobby Goals Ratings) delivers a phenomenally accurate assessment of each horse in the race. It has been proven to be slightly more accurate than the market itself by using three mathematical tests; Chi-Square, Logistic Regression and ROC AUC and AP. BGR has been developed over years using modern maths techniques.

BGR is an unstoppable force – an essential asset that elevates your arsenal to new heights. With it you're reading to conquer; without it, you're at a distinct disadvantage.

HFC and HFCXTRA supply you with a comprehensive review of each horse's suitability for the course it is running on. Similar to FC, the average starts at 0. Negative scores are in red. The first-row focuses on Win and the second-row concentrates on place and performance.

LENS Scrutinizes all factors relating to the race itself. Every horse starts at zero and negative scores are red. All factors are weighted by importance and grouped together. For example, if a horse has preferred going conditions, it will score positive on that aspect, but may not necessarily have a positive score if other elements are negative.

4rnform is a star-based indicator of the horses' recent form or last race.

5 stars – Excelled

4 stars – Notable

3 stars – Underwhelming

2 stars – Letdown

CrystalLine Centres solely on the race, offering guidance on likely performance, especially whether the horse is expected to exceed or fall short of expectations.

PROX is a Powerhouse. It can sniff out huge priced winners like no other. Focusing solely on profit angles, PROX can deliver golden insights. It has previously produced two 200/1 placed horses and a 66/1 winner within a few days.

Your competitive Edge

Imagine having a team of ten experts, each providing unique insights into every critical aspect of a race. They analyse data from 64 million perspectives, distilling it into a clear, user-friendly format. This product is truly ahead of its time, almost like having a secret weapon. In any competition, preparation is key, and with this tool, you gain a significant advantage over the rest. It's a revolutionary asset that takes your analysis to new heights you've never experienced before.
